FRANKLYN CHIGOZIRIM NGURUKWEM

Surulere, Lagos State | ngurukwemfranklyn@gmail.com | +2347045503252

PROFILE

Python Developer and Data Analyst with practical experience in Python application development, data analysis and reporting. Experienced in REST API integration, Flask web development, data pre-processing & analysis and Power BI dashboard development using Python, SQL, Pandas and Excel. Skilled in OOP, CRUD application development and version control with Git/GitHub.B.Sc Computer Science.

KEY SKILLS

Data Entry | Microsoft Excel | Microsoft Word | Data Processing | Data Cleaning | Data Visualisation | Dashboard Development | Data Accuracy | Google Sheets | Attention to Detail | Communication | Python | Pandas | SQL | Power BI | Git/GitHub |

WORK HISTORY

Python Development Intern - Synent Technologies **April 2026 - June 2026**

Position: Python Developer Intern

- Developed a Python-based CLI Task Manager implementing CRUD operations, Object-Oriented Programming (OOP), and persistent file storage using file handling.
- Built a Weather Application by integrating a RESTful API, implementing HTTP requests, JSON parsing, exception handling, and real-time weather data retrieval.
- Developed a Flask web application using dynamic routing, Jinja2 templates, and backend logic to deliver responsive, server-side rendered web pages.
- Debugged, tested, and refactored Python applications to improve code quality, optimize performance, and ensure maintainable, error-free implementations.
- Utilized Git and GitHub for version control, repository management, branch-based development, and source code tracking throughout the software development lifecycle.

Industrial Trainee (Data Analytics) - Octave Analytics & Insights **March 2025-August 2025**

Position: Data Analyst Intern

- Pre-processed data using Python (Pandas) and Excel by handling missing values, eliminating duplicates, and data inconsistencies to improve dataset quality for analysis.
- Conducted exploratory data analysis (EDA) on business and public-sector datasets using statistical techniques to uncover trends and support data-driven decisions
- Developed over 15 interactive Power BI dashboards using KPIs, DAX, and visualisations, enabling stakeholders to monitor performance and key business metrics.
- Contributed to the Nigerian Budget Analysis and EFInA Financial Inclusion projects by processing large datasets and extracting structured data with PyPDF2 for analysis.
- Automated data synchronization with Google Sheets and supported the AI Immersion Registration System, improving reporting efficiency and data accessibility.

PROJECT

- Student Academic Results Management System (Dissertation) 2026
- Nigerian Budget Analysis Dashboard 2025
- EFInA Financial Inclusion Analysis 2025
- Power BI Dashboard Development (18+ Dashboards) 2025
- AI Immersion Registration System 2025
- Google Sheets Data Synchronization Project 2025
- CLI To-Do List Application 2026
- Weather Application (API Integration) 2026
- Flask Web Application 2026

EDUCATION

B.Sc. Computer Science **2026**

Michael Okpara University of Agriculture, Umudike, Abia State

CGPA: 4.09/5.00

Dissertation:

A System-Oriented Approach for Handling and Accessing Student Academic Results in Tertiary Institutions

Secondary Education **2021**

Federal Science College | Ogoja, Cross River State

ACADEMIC/PROFESSIONAL CERTIFICATES

- Soft Skills & Workplace Competency Certification – Jobberman Nigeria 2026
- Python Development Certification – Synent Technologies 2026
- NSQ Level 3 – Frontend Web Development, (CPN) 2025
- Certificate of Completion – Industrial Training (Data Analysis), Octave Analytics 2025
- WASSCE (West African Senior School Certificate) 2021
- NECO (National Examination Council Certificate) 2021

AFFILIATIONS & MEMBERSHIPS

- Member — Nigeria Association of Computing Students (NACOS) 2025 - present
